

# Transformation Services

Delivering reduction in OPEX, optimization of CAPEX and providing Total Cost of Ownership Savings.

Fusion Solutions Service offerings are geared towards helping clients lower OPEX, extend the life of CAPEX and provide TCO (total cost of ownership), thereby increasing economic value for our clients. With telecom OEMs helping carriers and MSOs roll out triple & quadruple play and IT companies modernizing infrastructure, CAPEX and OPEX are major considerations.

Our Transformation Services offering can provide TCO savings of 10% to 20%, with exact number determined after the engagement project.

Fusion Solutions Inc. is also a leading provider of telecom, network communications, ERP and IT consulting and staffing services for Fortune 1000 companies. We're knowledgeable of and have worked with all types of technology infrastructure companies. With a diverse and experienced management team and qualified staff, Fusion Solutions Inc. is the partner of choice that can deliver OPEX and TCO savings in the world of convergence. We provide the same capabilities as the multi-billion dollar technology solutions and staffing companies without all of the overhead and bureaucracy.

Our client list includes major global telecom OEM, technology and service provider companies. We have built long term relationships with our clients by delivering wide range of workforce optimization solutions.

We provide variety of services to our clients to help with modernization of their networks while keeping costs, operational expenditure and capital, at minimum.

Transformation services are geared to lowering OPEX and providing TCO savings.
