

PRESS RELEASE

Fusion Solutions Announces the release of a new Candidate Viewing Tool ***"Video Resume Portal"***

DALLAS, TX – November, 2009 – Fusion Solutions Inc., a leading provider of staffing solutions for Telecom, IT, ERP and Network Communications recently released a new video resume service for its clients.

Fusion Solutions' clients now can enhance their interviewing process by viewing a candidate's video resume through Fusion Solutions portal. Clients are sent a secure, password protected login to the web portal in order to view videos of candidates that they are considering. The videos are recorded by Fusion Solutions' candidates to highlight their backgrounds.

According to John Manukian, Fusion Solutions' Recruiting Director, "Our clients can now assess our candidates as they describe their experience and capabilities. This should allow our clients to speed up their evaluation process of our candidates. We're looking to give our clients the most effective information to make the best hiring decision."

Security is an important aspect of the new Portal. "The confidentiality of the candidate videos was paramount in our implementation. We insure that the candidate approves sending his/her video resume to our client and the video is password protected so only our client manager can have access.", added by Mr. Manukian.

"At Fusion Solutions, we're always looking to bring value added services to our clients. *Video Resume Portal* is another new capability designed to differentiate Fusion Solutions with our clients", said Tahir Hussain, Fusion Solutions' President and CEO.
